EDUCATION

Villanova University. *Villanova, PA.*
M.S. Software Engineering   **Graduation Date: May 2019**

West Virginia University. *Morgantown, WV.*
B.Sc, Computer Science   **January 2011 - December 2014**

EXPERIENCE

The Institutes. *Malvern, PA.*
Software Developer Intern   June 2018 – August 2018
- Developed front–end software solutions using HTML, CSS, JavaScript, Drupal and PHP.
- Worked with information Technology team and customers to validate business requirements and design decisions in an agile environment.
- Collaborated with team on establishing estimates and team objectives to support sprint planning.

West Virginia Network (WVNET). *Morgantown, WV.*
Software Support Analyst   November 2014 – August 2017
- Worked as a software support for a degree audit and student information system. As a software support I provided technical expertise to clients during software installs, enhancements, upgrades and maintenance.
- Initiated more customers to purchase the student information software system and increase client's usage rate of the software system.

GE Transportation. *Dallas, TX.*
Reports Analytics Intern   May 2014 – August 2014
- Worked as a reports and analytics intern with focus on designing and developing business intelligence analytical reports and dashboards, as well as building software solutions that resolve existing internal problems at the company.
- My major accomplishments were building user-friendly Oracle Business Intelligence (OBIEE) dashboards to resolve existing materials planning problems for several planning teams and building a Single Page Application to resolve an existing engine arrival notification problem at engine repair site.

Current Projects
Liberia Identity Management System, *Villanova University*
Summary:
- Develop an identity management system as part of Liberia's learning management system that provides a uniform interface for identifying an individual within a school or entire education system.
